

HAVING A STRONG HOME is vital to safety and good health

How can you improve health and safety? Give the gift of a **“HAPPY HOUSE”**

Poor housing is associated with a range of health problems, including respiratory infections, asthma, injuries, and mental health issues. Since 1997, HHF has built strong, safe, clean houses. Recently, HHF added improvements to the original design: microflush toilet, rain water collection from the roof, and small solar lighting system.

**As many Haitian families face unsafe and unhygienic living conditions,
we can work together to provide healthier homes for \$4,000 per family.**
